Bidding system

This document describes, rule by rule, the system the bidding engine applies. It is generated from the rules file and follows its order and sections.

For every call the engine takes the FIRST applicable rule, in document order: its sequence matches the auction so far and its condition holds on the hand. If none applies, or if the rule's call would be illegal, the player passes.

The sequence is seen by the bidding pair: its own calls, passes included, and the opponents' calls in parentheses, their passes left out. "Opening": nobody in the pair has spoken yet. A leading "...": any beginning. "?": any call. "[trumps ♠]": the pair's agreed suit is ♠. The pair's initial passes are ignored, unless the sequence itself starts with Pass.

Points: HCP = high-card points (A 4, K 3, Q 2, J 1); HL = HCP + one point per card from the fifth in a suit headed by at least Q-J, less one point per bare honour or bare pair of honours; DH = HCP + shortness points (void 3, singleton 2, doubleton 1), same deduction; HLD = HL + shortness points. ♠ ♥ ♦ ♣ alone mean the length of the suit. Seat: the player's rank in the auction (1 = dealer, 4 = fourth seat).

Forcing: NF non-forcing, F1 forcing one round, FM game forcing, INV invitational, SO sign-off, REL relay, ASK asking bid, TO takeout double, PEN penalty. Status: SEF (SEF 2024 cards), SEF 2018, choix (chosen option), inferred (natural completion, not on the cards), to be checked.
